

Good to know

Before fishing

All fishing equipment and floatation suits/inflatable life vests are included in the price. Bring warm cloths, cap, gloves and good shoes, for example hiking shoes.

Fishing licence

Fishing in Finland is not difficult. Traditional angling and ice angling with one rod, is a common right and licence is therefore not required. It is also free for persons under 18 years or persons over 65 years to fish with one rod. For other fishing you need some sort of licence, and persons between 18 – 65 years also need the state fishing licence.

When fishing with Westcoast Sportfishing the fishing licence is included in the price, and we also arrange the licence for you.

Sustainable fishing

Westcoast Sportfishing supports and bring forward the knowledge of sustainable fishing. For us it is important that the waters and the species living there are well also in the future. We always release the fishes back to the waters, taking pictures or video film them so you can still bring a nice memory of the catch with you home.

Safety

Safety is the most important for us so that the trip is safe and accidents are avoided. Using life vests all the time is common praxis and our inflatable vests are comfortable also during rod fishing.

In charge for safety onboard is the fishing guide, Johan Nydahl. As a professional fishing guide he has First aid (FA1 and FA2) certificate, hygiene passport and held certification as charter boat operator's certificate, firefighting, VHF and navigation certifications. The boat used is also certified as charter boat.
